VOL.2 NO.1

THE FUTURE OF ACCOUNTING IS DIGITAL: WHY PROFESSIONALS MUST ADAPT OR BE LEFT BEHIND

The accounting profession is undergoing one of the greatest transformations in its history. Across the world, artificial intelligence, automation, cloud technology, blockchain, and data analytics are redefining how financial information is generated, analyzed, reported, and protected. What once required weeks of manual effort can now be completed in minutes through intelligent digital systems. The future of accounting is no longer approaching – it has already arrived.

For decades, accountants were primarily seen as record keepers and compliance officers. Today, however, the expectations have changed dramatically. Organizations now need professionals who can interpret data, provide strategic insights, detect risks, understand digital systems, and support decision-making in real time. Modern accountants are becoming financial strategists, technology-driven analysts, and trusted advisors to businesses and governments.

The rise of Artificial Intelligence (AI) is one of the most significant drivers of this transformation. AI-powered tools can process thousands of transactions instantly, identify unusual financial patterns, detect fraud risks, automate reconciliations, and generate intelligent reports with remarkable speed and accuracy. Cloud accounting systems now allow organizations to access financial data anytime and anywhere, improving collaboration, transparency, and operational efficiency. Data analytics tools help professionals uncover trends and make evidence-based decisions that support growth and sustainability.

While these innovations create enormous opportunities, they also present a serious warning to professionals who refuse to evolve. The reality is simple: those who fail to adapt to digital transformation risk becoming irrelevant in a rapidly changing world. The accounting profession is moving away from repetitive manual processes toward intelligent systems and strategic thinking. Employers and clients increasingly seek professionals who possess digital skills alongside accounting knowledge

THE FUTURE OF ACCOUNTING IS DIGITAL...

However, this transformation should not be viewed as a threat, but as an opportunity. Technology is not replacing accountants; rather, it is replacing outdated methods of working. Professionals who embrace innovation will become more valuable, productive, and globally competitive. The accountant of the future must be willing to continuously learn, unlearn, and relearn.

To remain relevant in the digital age, accounting professionals must develop competencies in the following areas:

1. Artificial Intelligence and automation
2. Data analytics and visualization
3. Cloud accounting systems
4. Cybersecurity awareness
5. Digital auditing and forensic tools
6. Strategic financial management
7. Communication and problem-solving skills

Beyond technical competence, adaptability and mindset will determine future success. The professionals who thrive will be those who are open to change, willing to explore emerging technologies, and prepared to embrace lifelong learning. In today's world, certificates alone are no longer enough; practical digital competence is becoming the true currency of professional relevance.

Educational institutions, professional bodies, and organizations also have a responsibility to prepare the next generation of finance professionals for the realities of the digital economy. Training programs must move beyond theory to include practical exposure to modern digital tools and real-world applications. The future belongs to professionals who can combine accounting knowledge with technology-driven solutions.

At ACCSA Global, we recognize that bridging the digital divide in accounting and finance is no longer optional — it is essential. Through our conferences, masterclasses, certification programs, and global initiatives, we remain committed to empowering professionals with the digital knowledge and strategic skills required to succeed in a technology-driven world.

The future of accounting is digital. The question is no longer whether change will happen, but whether professionals are prepared to evolve with it. In this new era, adaptability is not merely an advantage — it is a necessity. Those who embrace innovation will lead the future. Those who resist it risk being left behind.

The time to prepare is now.

OVERVIEW OF THE EGYPT TRAINING CONFERENCE

Theme: “Governance in the Digital Era: ICT Infrastructure, Financial Strategy & the Knowledge Economy”

Date: February 8–14, 2026

Location: Cairo, Egypt

The Association of Chartered Certified System Accountants (ACCSA) Global successfully concluded its Egypt Training Conference held from February 8–14, 2026, in Cairo, Egypt. The conference, convened under the theme “Governance in the Digital Era: ICT Infrastructure, Financial Strategy & the Knowledge Economy,” brought together professionals, academics, policy influencers, institutional leaders and administrators from across Africa, the Middle East, Europe, and North America. The event provided a strategic platform for knowledge exchange, professional capacity building, and critical discussions on the evolving role of governance, technology, and financial leadership in shaping sustainable institutions in the digital age.

The conference commenced with participant arrivals on Sunday, February 8, followed by formal opening sessions on day two - Monday, February 9, 2026. The opening remarks were delivered by Associate Professor Lambe Isaac, Africa Regional Representative of ACCSA Global, who emphasized the importance of strengthening governance structures through digital innovation, strategic financial management, and investment in knowledge-driven systems.

The first technical session, presented by Associate Professor Isaac, examined ICT Infrastructure as the Backbone of Smart Universities and Public Institutions, highlighting the role of digital infrastructure in institutional efficiency, transparency, and service delivery. This was followed by a presentation on Cybersecurity, Digital Ethics, and Responsible Data Governance by Mahmoud Hamouda, Transformation Leader and Strategist from Cairo, Egypt, which underscored the growing importance of ethical data management and cyber resilience in modern governance frameworks.

Day Three of the conference focused on the dynamics of the knowledge economy and financial strategy in the digital environment. Huzaifa Nakhoda of Dubai, UAE delivered a thought-provoking paper on The Knowledge Economy: Leveraging Data, Innovation, and Intellectual Capital for Development,

EGYPT TRAINING CONFERENCE...

emphasizing innovation ecosystems and intellectual capital as drivers of national and institutional competitiveness. Associate Professor Lambe Isaac subsequently facilitated a session on Financial Strategy in a Digital Economy: Innovation, Risks, and Accountability, addressing emerging financial risks, governance expectations, and the need for accountability in digitally transformed economies.

The official keynote address was subsequently delivered by Professor Adebayo Paul. Adejola, the Global Representative and Training Director of ACCSA Global, reinforcing the central role of professional accountants and system strategists in supporting institutional resilience. Professor Adejola then proceeded to provide a practical and hands-on presentation on Artificial Intelligence and Automation in Financial Management and Public Administration, highlighting how AI-driven systems are transforming decision-making, reporting, and public sector performance. The session was an intensive one, with participants expressing their delight on the value addition received during the technical session.

The fourth day centered on leadership and institutional transformation in the digital era. Huzaifa Nakhoda delivered a session on Leadership and Change Management for ICT-Driven Reforms in Governance and Education, emphasizing adaptive leadership and strategic change management in technology adoption. Associate Professor Lambe Isaac presented on Digital Governance and Institutional Transformation in the 21st Century, examining governance reforms necessary for transparency, accountability, and digital service delivery. The final technical paper, was presented by Dave Ante of Louisiana State University, USA, addressed Digital Inclusion and the Future of Work, focusing on workforce readiness and the need to prepare emerging economies - particularly in Africa -for participation in the knowledge society.

Interactive brainstorming sessions held throughout the conference enabled participants to share practical experiences, develop collaborative solutions, and align professional practices with global governance trends.

EGYPT TRAINING CONFERENCE...

The conference concluded with participant responses, presentation of certificates, and closing reflections emphasizing the importance of continuous professional development, cross-border collaboration, and the integration of ICT infrastructure with sound financial strategy. Beyond the technical sessions, participants engaged in cultural tours, networking activities, and open-day engagements that strengthened professional relationships and fostered international cooperation within the ACCSA Global community.

The ACCSA Global Egypt Training Conference 2026 reaffirmed the Association's commitment to advancing professional excellence, promoting governance innovation, and equipping members with the knowledge and strategic insight required to navigate the complexities of the digital economy. The outcomes of the conference are expected to contribute significantly to ongoing professional discourse on governance reform, digital transformation, and the development of resilient institutions across emerging and developed economies alike.

ACCSA Global Delivers Impactful March 2026

MasterClass in Nigeria

The Association of Chartered Certified System Accountants (ACCSA Global) has once again, successfully convened its March 2026 MasterClass in Abuja, Nigeria, from March 25–27, 2026, at the Nigerian Army Resource Centre. The three-day flagship programme, themed “Digital Wealth & Investment Mastery: Preparing for Retirement in the Age of Financial Innovation,” attracted a diverse audience of finance professionals, public sector executives, entrepreneurs, and emerging leaders committed to strengthening their financial intelligence in a rapidly transforming global economy.

The MasterClass commenced with opening remarks by Associate Professor Lambe Isaac, Africa Representative of ACCSA Global, who welcomed participants and underscored the importance of continuous professional development in today’s digitally driven financial landscape. This was followed by a compelling keynote address delivered by Prof. Adebayo Paul Adejola, ACCSA Global Representative and Training Director, who set the tone for the programme with very apt and powerful messages. He noted that while retirement is inevitable, financial security is not automatic. As it requires deliberate planning, structured investment strategies, and informed decision-making. He highlighted the growing influence of artificial intelligence, digital platforms, inflationary pressures, and increased longevity on financial planning, urging participants to transition from being mere income earners to becoming “wealth architects.”

The programme featured a comprehensive lineup of expert-led sessions designed to bridge theory and practice. Key presentations included “The Architecture of Wealth in the Digital Economy,” “Risk, Returns and Resilience in Financial Innovation,” and “Strategic Retirement Planning: Beyond Pension and Salary.” These sessions provided participants with practical frameworks for evaluating investment opportunities, structuring diversified portfolios, and managing emerging financial risks in a technology-driven environment.

A distinctive feature of the MasterClass was its strong practical orientation. Participants engaged in hands-on sessions focused on digital investment tools,

ACCSA Global Delivers Impactful March 2026 MasterClass in Nigeria

financial modelling, and the application of structured wealth-building strategies. In addition, interactive brainstorming sessions - anchored on real-life case studies such as “High Income, Low Wealth” and “Five Years to Retirement” - enabled participants to critically analyze common financial pitfalls and develop actionable solutions tailored to modern economic realities.

Throughout the programme, emphasis was placed on addressing critical retirement risks, including inflation, longevity, inadequate investment structures, and overreliance on pension systems. Participants were guided on how to design resilient financial architectures that integrate income generation, investment growth, and risk protection, while also leveraging digital financial innovations responsibly.

Day Two and Day Three of the MasterClass deepened participants’ engagement through practical application sessions, a refresher assessment, and reflective discussions aimed at consolidating learning outcomes. The programme concluded with the induction of participants and the presentation of certificates, marking their successful completion of the training and reinforcing ACCSA Global’s commitment to building globally competitive, technology-driven finance professionals.

Overall, the March 2026 MasterClass stands as a significant milestone in ACCSA Global’s ongoing mission to bridge the digital divide in accounting and finance. By equipping participants with cutting-edge knowledge, practical tools, and strategic insights, the programme not only enhanced professional competence but also empowered attendees to build sustainable, future-ready wealth structures in an increasingly complex and digital financial ecosystem.

MEMBERS SPOTLIGHT: THE INDUCTION EXPERIENCE

Real Stories. Real Impact. A New Era of Forensic Accounting.

"Good morning... I'm really privileged to be here as an individual. And therefore I just want to say this: I came into contact with ACCSA during the last induction. And my contact with the Association has been very, very fruitful. I just realized, actually, that along the world I was... well... I've not been doing it. I had all of us to be good ambassadors, to spread the word about ACCSA, because definitely, it's one Association that has the capacity to make a serious difference in all accountants. Thank you very much." — **Prof. Ibrahim Magaji Barde Special Adviser to the Kano State Governor on Revenue**

"Being an expert in tax, when you look at it, you will find out that the world is moving. And you don't want to be left behind. This is the place to be. It's a privilege for me to be here. I came in through someone who told me about this, and I can tell you that the knowledge gained here is vast. The most important thing for me is the connection between IT and taxation. As tax professionals, we cannot work in isolation. We need to be IT-driven to perform our tasks effectively and efficiently. This training has really opened my eyes to the digital space and how it impacts revenue generation and management. I encourage everyone who wants to grow their career to be a part of this. Thank you." — **Ogundairo Elizabeth Olaitan Senior Manager Tax, Nigeria Revenue Service**

"Good morning everyone. It's a privilege to be here. Since Monday, I think on my status, I posted, and someone saw the picture and said, 'Ah, this is Professor Adebayo!' I said, 'Yes, sir.' He said, 'Don't worry, you are in the right place, and you are going to win some cash!' So, it is an opportunity, and I got to know about ACCSA through Alhaji Shettima. Every time I go—anytime I go for some... this man will just say, 'Madam, this money you are using to go to parties, bring this money, come and register! Instead of our money, just come and start something.' So, I will say I came here probably like a novice, but today I can tell you that my vault is full! I think I'm ready to take it to the sky. I want to appreciate everyone, ACCSA Global in general. God bless you. Thank you." — **Adeniyi Odunayo Patricia Internal Auditor, Independent National Electoral Commission (INEC)**

MEMBERS SPOTLIGHT: THE INDUCTION EXPERIENCE

Real Stories. Real Impact. A New Era of Forensic Accounting.

"Good morning, everyone. My name is Mnena Scholastica Mbaezue. I am the Head of Operations for Zenith Bank. I actually got to know about ACCSA through a colleague of mine who is already a member. Coming here, my expectations were high, but I can tell you that they have been surpassed. What struck me most is the depth of the forensic aspect of the training. In the banking sector, we deal with a lot of data and, unfortunately, a lot of attempts at fraud. Learning how to systematically track and prevent these using IT-driven tools is a game-changer. It's not just about traditional accounting anymore; it's about being a digital detective for your organization. I am going back to my branch with a much broader perspective. Thank you to the organizers." – **Mnena Scholastica Mbaezue Head of Operations, Zenith Bank**

"Hello, everyone. My name is Zakari Suleiman. I am a Manager of Tax with the Nigeria Revenue Service. I've spent several days here now, and the experience has been incredibly eye-opening. As tax administrators, our biggest challenge is often the 'missing link' between financial records and digital footprints. This program has bridged that gap. The facilitators are top-notch; they don't just teach theory, they show you the practical application of forensic tools in auditing and revenue assurance. I feel much more confident now in navigating complex digital systems to ensure compliance. This is a must for anyone in the revenue or auditing space. I'm proud to be part of this induction. Thank you very much." – **Zakari Suleiman Manager Tax, Nigeria Revenue Service**

"Good afternoon, everyone. My name is Uchenna Clems Ozegbe. I am a Managing Partner at Hansy Clems & Co. I'm here for the ACCSA induction, and I must tell you, it has been a paradigm shift for me. Coming from a background where we do a lot of core accounting and manual auditing, seeing the level of automation and the forensic tools available today is eye-opening. The facilitators have done a marvelous job in simplifying complex IT concepts. For me, the highlight has been learning how to use technology to uncover hidden patterns in financial data. In today's world, you cannot claim to be a complete accountant if you are not tech-savvy. This program is not just an induction; it's a total retooling of your professional skills.

MEMBERS SPOTLIGHT: THE INDUCTION EXPERIENCE

Real Stories. Real Impact. A New Era of Forensic Accounting.

I'm very glad I made the decision to be here. Thank you." — **Uchenna Clems Ozegbe**
Managing Partner, Hansy Clems & Co.

"Good morning, colleagues. I am Lola O. Adeyemi, Director of Finance and Accounts with the Nigeria Immigration Service. I want to start by saying that I am very impressed with the curriculum of this program. It is very timely, especially given the direction the world is going regarding transparency and accountability. In the public sector, we are constantly looking for ways to tighten our systems and ensure that every naira is accounted for. The forensic system accounting training I've received here has provided me with practical strategies that I can immediately implement in my department. It's about being proactive rather than reactive. I want to encourage other senior officials and directors to take this training—it changes your perspective on oversight and financial management. It has been a wonderful experience. Thank you very much." — **Lola O. Adeyemi Director of Finance and Accounts, Nigeria Immigration Service.**

"My name is Jimoh Abiola, I am a Deputy Civil Defence Commandant of Nigeria, PhD, and I'm the Head of Insurance for the Corps. It is a thing of joy to be here to associate with a great organization as ACCSA. ACCSA is doing a great thing when it comes to technology and when it comes to digital investigation. I feel that it is a thing of pride for anybody to have ACCSA attached to his or her name because we are going digital, and the world is a global village now. Without knowledge of digital investigation and forensic system accounting, you are a novice in this world of today. I really appreciate the Chairman, the Registrar, and all the management team for making this to be a success. Thank you and God bless." — **DCC Jimoh Abiola PhD Head of Insurance, Nigeria Security and Civil Defence Corps (NSCDC)**

PAMELA NJ
INTERNATIONAL PRESIDENT, ACCSA GLOBAL

FROM THE DESK OF THE INTERNATIONAL PRESIDENT

WELCOME TO THE APRIL/MAY 2025 EDITION OF ACCSA GLOBAL'S NEWSLETTER!

Dear Esteemed Members, Partners, and Friends,

It is with great joy and immense pride that I welcome you to this edition of ACCSA Global's Newsletter. This publication is a milestone in our journey to keep you informed, inspired, and engaged in the evolving fields of accounting, finance, forensic auditing, and corporate governance.

The Necessity of Joining the Team of Global System Accountants:

The world of accounting and finance is evolving rapidly, driven by artificial intelligence, big data analytics, forensic auditing, and digital transformation. To remain relevant and competitive, professionals must adapt, upskill, and align with forward-thinking organizations like ACCSA Global.

USA: 3535 S. Sherwood Forest Blvd, Suite 201 Baton Rouge, LA 70816, USA . Tel: [+1 225 439 5539]

Africa: Suite C67, Area 11 Shopping Mall, Garki Abuja, FCT-Nigeria. Tel: +2349080164823, +2349080164822, +2348185576058, +2348176872210.

AS AN ACCSA GLOBAL MEMBER, YOU GAIN ACCESS TO:

- ✓ Cutting-edge training in AI, forensic accounting, and risk management.
- ✓ International networking and career advancement opportunities.
- ✓ Exclusive research, industry reports, and professional certifications.
- ✓ A platform to contribute to financial innovation and governance reforms.

In an era where financial integrity and transparency are paramount, the role of Global System Accountants cannot be overstated. Whether you are an aspiring accountant, an experienced auditor, or a finance executive, ACCSA Global provides the tools, knowledge, and connections you need to excel and make an impact on a global scale.

Looking Ahead!

This newsletter is your go-to resource for industry trends, upcoming training programs, member success stories, and policy insights. We encourage you to engage actively, share your feedback, and take full advantage of the opportunities that ACCSA Global offers.

Once again, I extend my heartfelt congratulations to all members and stakeholders on this historic achievement. Let us continue to build a global network of exceptional accountants and finance professionals who are ready to lead with knowledge, ethics, and innovation.

JOIN US, STAY ENGAGED, AND BE PART OF SOMETHING EXTRAORDINARY!

Warm regards,

Pamela Njemanze
